What is love?

**What single thing
would you most like to
achieve in your life?**

Do we work too many hours?

**Would you ever eat at a
restaurant alone?
Why/why not?**

**How would you spend your
money if you won the lottery?**

**If you weren't doing your
current job what would you
love to do instead?**

**How soon into a relationship
do you think you can
really know that they're
the one?**

**Do you think the future will
be better or worse
than the present?**

Do you think it's nature or nurture that defines us?

Would you rather lose your sense of sight or sound?

Is there anyone you regret losing touch with?

Are we living life the right way?

Do you think open relationships can work?

What is your favourite country and why?

Do you think the man should always pay on a first date?

Does power corrupt?

If you could have dinner with three strangers who would they be and why?

Is technology a good thing?

What's your secret ambition (if you have one)?

How often should we be allowed to check social media a day?
